METHOD GARDENING

Helping growers build sustainable food sources at home

By Jenna Lawrence

INGREDIENTS:

Filling:

- ☐ Cardboard (plain no glossy print)
- ☐ Tree pieces
- ☐ Compost
- ☐ Aged Manure
- ☐ Food waste
- ☐ Sawdust shavings
- ☐ Flat rocks

Frame:

- ☐ Nine - eight ft 2″x4″ (non pressure treated lumber)
- ☐ One - eight ft 4″x4″ (non pressure treated lumber)
- ☐ 4″ deck screws

Tools:

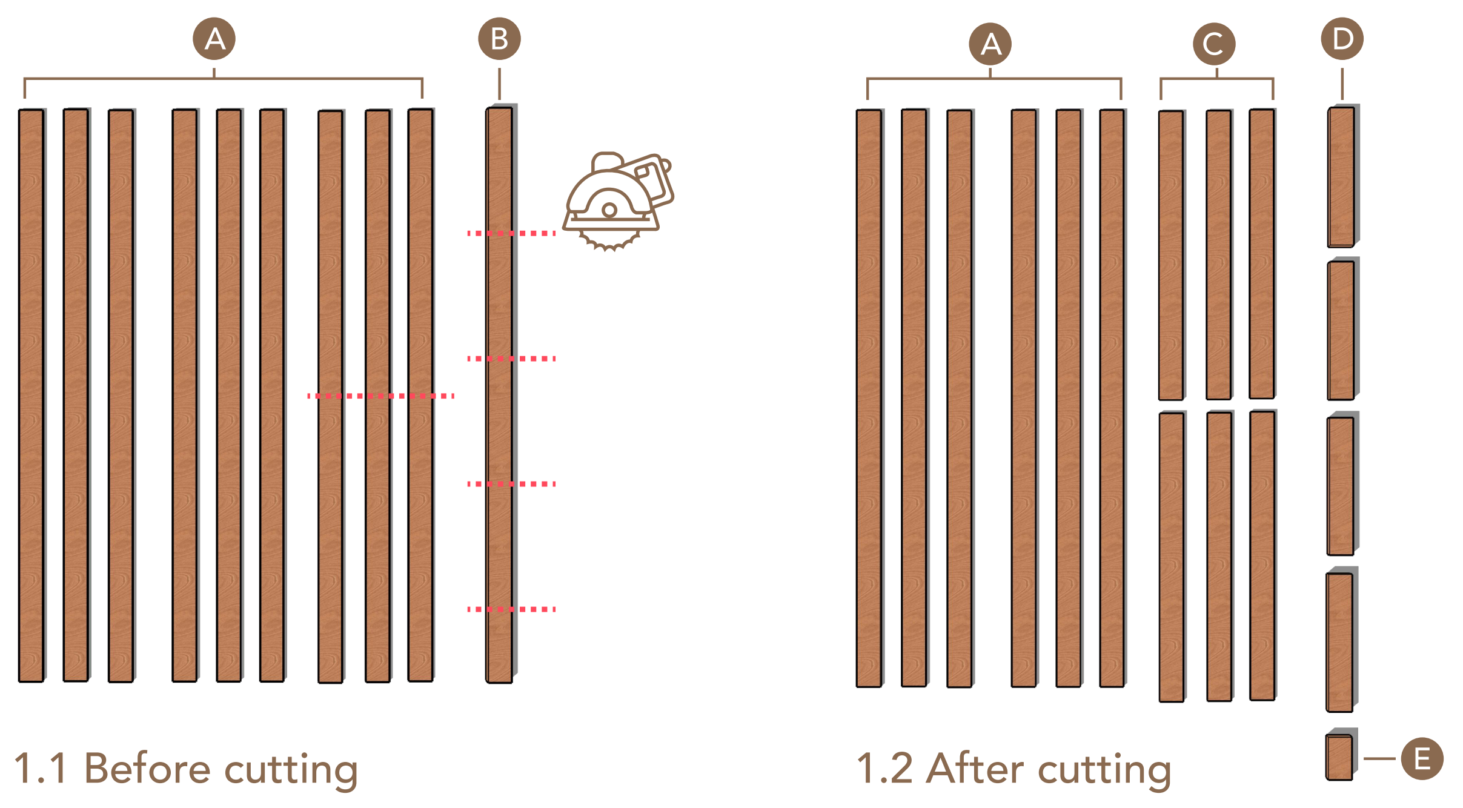
- ☐ Power drill + drill bits
- ☐ Circular saw
- ☐ Eye protection
- ☐ Pencil
- ☐ Carpenter's square
- ☐ Level

BUILDING A RAISED GARDEN BED

Step 1: Cutting your lumber

Cut three of your A. 8 ft. 2″x4″ pieces in half. From your B. 8ft. 4″x4″ piece, cut four pieces that are each ~12.5″ long.

You should now have:
A. Six 8 ft. 2″x4″ pieces
C. Six 4 ft. 2″x4″ pieces
D. Four ~12.5 inch long 4″x4″ pieces
E. One left over scrap 4″x4″ piece



1.1 Before cutting

1.2 After cutting

Step 2: Assembling in place

Screw the sides (A) into the 4x4 support posts (D.)

Step 3: Levelling your raised garden bed

Use flat rocks to level your raised garden bed. Skip this step if your ground is level.

FILLING THE GARDEN BED

Step 4: Filling the raised garden bed

- Line the bottom your garden bed with cardboard and soak it with water.
- Use a wheelbarrow and make a ramp out of a sturdy board to be able to dump your soil and compost directly into the box.
- Read your seeds, check last and first frost, and plant for your growing zone.
